FRIDAY MAY 29 1936.

NUMBER 2

Dr. Leech Is New
Rotary President

At the regular meeting of the Raymond Rotary Outpost held Tuesday evening in the United Church, Dr. G. W. Leech was unanimously chosen President for the coming year which commences July 1st. Dr. F. M. Hall is Vice-President and M. Rayo Woolf is Secretary-Treasurer. In the nominations in May, J. Orvin Hicken was nominated for President, but with his appointment as Bishop of the Raymond First Ward he felt that it would be impossible for him to carry on as President of the Club and asked to have his name withdrawn from nomination which was consented to by the members.

The Outpost also accepted an invitation from the Cardston Club to join with them on Wednesday, June 3rd in an afternoon of sports, with the luncheon and a dance in the evening. This will take the place of the regular June meeting, and a good representation from the local Club is expected.

Chas. D. Compton, who is leaving for Montreal next week, and who has been a member of the Outpost since its organization was asked to speak briefly on the eve of his departure, and Pres. Lambert Pack bade him good-bye and wished success in his new labors on behalf of the Club.

Pres. Lambert A.H. Zabriske and Dr. Leech who had attended the District Convention in Saskatoon, each reported some phase of the same, and were enthusiastic and full of pep for Rotary and its aims as a result of being at the Convention. Arnold who reported the social side of the Convention, was high in his praise of the Saskatoon Club and the splendid arrangements they had made to care for and entertain the visitors.

Wedding Bells

GREY — McMULLIN

Jack, eldest son of Mr. and Mrs. S. C. N. Grey, and Doris, daughter of Mr. and Mrs. A. L. McMullin were married at the bride's home amidst a setting of apple blossoms and gladioli, when the ceremony was performed by Bishop James H. Walker in the presence of the parents of both parties and a number of friends. Dean and Edythe McMullin, brother and sister of the bride acted as best man and bridesmaid.

The young couple spent a short honeymoon in Lethbridge and other points, and will make their home for the present in Picture Butte where Jack is working on the new Sugar Factory. The best wishes of their many friends are extended for a long and happy married life.

GEHMLICH — OLSON

at the Alberta Temple on Wednesday, May 27th, of Fritz Gehmlich, and Miss Edna Olson, of Hill Spring, Alberta, with Pres. E. J. Wood officiating. Following the ceremony, which was witnessed by relatives and friends of both parties, a wedding supper was served at the Olson home in Hill Spring.

The young couple will make their home in Picture Butte where Fritz is employed with the Canadian Sugar Factories, Ltd. They have the best wishes of their many friends in Raymond for a long and happy married life.

Fritz's car, on Thursday morning was well decorated with paper, old shoes, old sauce pans, and what not, and certainly advertised the fact that a wedding had taken place. We join with their many friends in extending congratulations.

NEWS NOTES

Mr. McCullough of the Kellogg's Company was a Raymond visitor today.

Porter's Garage sold a new 1936 Terraplane Coupe to Dr. Weins this week.

Ev. Blackstock and his Band will open the Dancing Season at the Blue Moon Pavilion on Wed. June 3rd.

The Dunning budget passed on Thursday with the \$100 tour 1st clause in it, and if we understand it right Canadians may bring back that amount of merchandise from the States free of duty following a visit there. We understand the limit of exemptions is four times a year.

Filling the gas tank on his tractor Thursday afternoon Allan Hoover of Vulcan, was badly burned when the gasoline ignited and set fire to his clothes.

Departmental examinations for Grade VIII and all High School grades will commence June 15. Grade VIII will finish June 29th, the High School grades being kept busy until June 30th.

Nicholas and Clarence Swartemberger, 15 and 11 years respectively of Crossfield were drowned while swimming in a pond there, defeating efforts of their father and another good swimmer to rescue them. The bodies were recovered later.

O.H. Snow and H.R. Bryner were in Calgary Tuesday interviewing immigration officials with respect to Mary Bryner's passport visa. We understand Hardy has the offer of steady work with relatives in Utah and is arranging to move to the States.

A province wide check up of Driver's licenses has been ordered by the Government. Only 64,000 out of an estimated 150,000 drivers in the Province have obtained the little yellow slips. If you have not obtained yours yet better take this warning and get busy.

Beet workers refused the ultimatum of the Beet Growers' association issued on Tuesday, and on Wednesday growers were going ahead with other plans for getting the beet work done. Hampt Wilbeck takes nearly 70 beet workers out to the fields each morning and brings them home again at night.

"Red Ryan was shot down by police officers in Kingston, Ontario Saturday night last as he and an accomplice were robbing a liquor store. Ryan killed a policeman before he was fatally shot. Last July he was paroled from Kingston penitentiary on the promise that he would go straight and use his influence to reform other law breakers. Apparently he was unable or did not care to keep his word.

Alberta will lose a valued educator and a splendid citizen in the departure of Pres. R. C. Wallace of the University of Alberta to become President of Queen's University in Montreal when the fall term opens. No appointment of a successor has been made as yet, among those mentioned being Dr. D. A. MacGibbon at present a member of the Wheat Board. Dr. Wallace has left his mark on the lives of hundreds of our people who have passed through the Alberta institution of higher learning during his years of teaching there.

Six New Records Made at
Cardston Meet

A large number of Raymond people attended the Track Meet in Cardston Monday, and quite a few local athletes took part. The weather was ideal all day long, and probably because of this fact, six Provincial records were broken as follows:

Dorothy Gosstick of Bellevue in the class under 18 for girls threw the baseball 192ft.1". The former record was 188ft 5".

The same girl ran the 60 yard dash in 7 and 3-10; the old record here was 7.4.

Dawn Anderson of New Dayton, in girls under 16, set a new record in the High Jump when she cleared the bar at 4ft 7 3/4".

The old mark being 4ft 6 1/4". Dawn also equalled the former record in the 60 yard dash making it in 6.4.

Alex Bland of Taber stepped the century in 9.7, the old mark being 9.8.

Boyd Whitehead of Claresholm, in the boys 14 years and under made a broad jump of 14' 6", the old record being 14ft 5 3/4".

The Senior Relay went to the Cardston team of Oliver Wayman, Ernest Meyer, Brigham Card and Delbert Steed who ran the mile in 3' 48 4-10. The old record was 4' 1. made by Bill Laidlaw, Dee and Roy Card and Ken Walters also of Cardston in 1925, and this record has not been equalled since.

Beverly Cheesman, holder of the discus throw for the Province beat his own record by 1 in when he threw the plate 92' 3/4".

News Notes

Half of the troubles we worry about never happen. Why not give this neergy.

Edward McMullen, believed to be a partner in crime with Ryan fatally wounded himself at Blaine, Wash., Thursday night, after killing an immigrant on officer and attempting to shoot another one as they sought to question him.

Beet workers went to work Wednesday morning where there was work for them to go. They accepted the terms offered by the Growers, and their cage officials permitted them to make their own arrangements with the men the workers for.

The "Queen Mary" Britain's leviathan of the seas for passenger ships neared New York harbor today on her maiden voyage with a passenger list of over 2,000 and a crew of over 1,200. According to photos the appointments of this mammoth vessel must be luxurious. Because of the newness of her motors it is not expected she will try for a crossing record on this trip at least.

One of the worst electrical storms in the history of the city struck Calgary last Friday at noon when telephone and power poles were struck by lightning in several places and the downtown area of the city left without light for part of the afternoon. The same storm gave Lethbridge half an inch of rain in half an hour and had the water almost overflowing the gutters. Locally we had a half dozen drops of rain and a light clap or two of thunder.

THE CLASS CHAMPIONS

Class champions were as follows:

Girls under 16—Dawn Anderson, New Dayton 37 points.

Girls under 18 — Dorothy Gosstick, Bellevue, 50 points.

Girls Senior—LaPriel Layton, Glenwood, 47 points.

Boys under 14 — Kenneth Knight, Woolford, 37 points.

Boys under 16—Forest Sherwood, Lethbridge, 60 points, who had the largest aggregate of any contestant, and was Champion of the Field.

Boys under 19 — Beverly Cheesman, Cardston, 51 points.

Senior Men — Lionel Fournier, Pincher Creek, 54 points.

Jerome Platt, running under the colors of the Taber A.A.A. won the 5 Mile Road Race again, and the Junior Road Race was taken by Grant Glenn, Cardston.

Jane Walker placed second in High Jump for girls under 16. Raymond also won the Girl's Relay for those under 16.

Mark Dahl placed second in the 440 yard run for boys under 14.

Noel Keith, in the boys under 16, placed second in the 440; first in the 880; and second in the High Jump.

Keith Humphries, Picture Butte, but recently of Raymond was 3rd in the 880 for boys under 16.

We congratulate the local winners and hope they will keep on and go on to greater victories as they advance in years.

Funeral Services
For Mrs. Geo. Clark

NEWS NOTES

RENEW YOUR RECORDER?

Gordon Brewerton of Cardston was a Raymond visitor today.

Albert S. Duncan, eldest son of the editor of the Crag & Canyon, a student at the University of Alberta for the past seven years, has been awarded an assistant research scholarship in McGill University for the next term of that institution.—Crag and Canyon.

The School of Agriculture grounds are very attractive at this time of year with the lilacs, tulips, etc. in full bloom. The dry weather makes it difficult for Mr. Burnett to have these things looking their best.

The local baseball nine officially opens the season next Wednesday in New Dayton and will take part in a Baseball Tournament there, one game of which will be a regular league fixture. The new uniforms are here and the boys are "rarin" to go.

GARDENS IN RAYMOND

You can hear the talk almost anywhere now, "I just planted my peas. Did you?"

"Mine have been up a week. I used to plant mine earlier but I found they matured about as quickly if put in a little later." And so it goes. The gardens are an absorbing topic of conversation. Supplies of certain favorite items canned last season are running short and there's nothing like your own canned stuff.

Some plant and hoe weed from habit, some to have something to do, some because they like to see the things grow and most of us because we like a few real fresh vegetables for the picking in the cool of the early morning or evening.

In connection with all this garden talk the following from an article by Rex Beach in June Cosmopolitan is interesting:

"You'd think, wouldn't you, that a carrot is a carrot—that one is about as good as another as far as nourishment is concerned? But it isn't; one carrot may look and taste like another and yet be lacking in the particularly mineral element our system requires and which carrots are supposed to contain. Laboratory tests prove the fruits, the vegetables, the grains, the eggs and even the milk and the meats of today are not what they were a few generations ago. (Which doubtless explains why our forefathers thrived on a diet of foods that would starve us.) No man of today can eat enough fruits and vegetables to supply his system with the minerals salts he requires for perfect health because his stomach isn't big enough to hold them! And we are running to big stomachs.

No longer does a balanced and fully nourishing diet consist merely of so many calories or certain vitamins or a fixed proportion of starches, protein and carbohydrate. We now know that it must contain in addition something like a score of mineral salts.

It is bad news to learn from our leading authorities that 99% of the American people are deficient in these minerals, and that a marked deficiency in any one of the more important minerals actually results in disease. An upset of the balance, any considerable one or another element, however microscopic the body requirements may be and sicken, suffer, and shorten our lives.

Funeral services over the remains of Mrs. Geo. Clark were held in the Raymond Second Ward Chapel Friday afternoon last at 2 p.m., with Bishop J. H. Walker conducting the services. Music was under the direction of Jos. McLean, Ward Choirister, and special numbers were a solo "I Know that My Redeemer Lives," by Bishop Walker, the choir joining in the Chorus, and a Duett "Cast Thy Bread Upon the Waters," by Mrs. Blanche Scoville and Wm. C. Stone. The hall was beautifully decorated, and there was lovely array of flowers, both hot house and garden blooms.

Speakers were Elders Jas. S. Anderson and J. W. Evans, both of whom had known deceased for years, and praised the faithfulness and integrity, and unassuming nature of her character. Jas. S. Anderson had lived neighbors to her for years and knew her devotion to her family, and her love for the Church. The speakers praised the willingness of her deceased husband, as well as Mr. Clark who survives to serve wherever and when ever asked to, and the three children who were staunch members and willing workers in the Church.

Interment was in the local cemetery, and Christensen Bros of Lethbridge had charge of arrangements there.

Mr. and Mrs. Chas Porter and daughter, of Medicine Hat, was visiting here last Sunday with Mr. and Mrs. W. B. Porter.

Next week will see the opening of the Stampede season, and from then until the last of July there will be two or three shows a week in Southern Alberta.

Nine people were injured in motorcycle and automobile accidents in Southern Alberta over the week-end and holiday. Luckily none of the injuries were serious.

Canada's famous "D'Onofre Quintuplets" celebrated their second birthday Thursday. According to Dr. Dafeo, they are within two pounds of the weight of children of the same age born singly.

Picture Butte News Of
Local Interest

(From our own Representative)

Visitors last week in Picture Butte included Mr. and Mrs. P. Delhin Bennett, and Mesdames Wm. Fairbanks and Grey Kirkham.

The road crews are now working into town from both directions, so gravelled roads will soon be a realized dream.

On Monday a number of picnics were on the Little Bow River, among them being Mr. and Mrs. Dick Wayling, Mr. and Mrs. J. Pickett and Mr. & Mrs. Fred Brown and children.

The Swimming Pool Dance on Wednesday evening was a great success, and those in charge of it are certainly worthy of commendation. The committee were Ross Humphries, Dick O'Brien, Bob Orgill and Jack Simpson.

The Primary officers recently selected are: Mrs. Alice Humphries, President; Mrs. Leonard Smith and Mrs. Fritz Gehmlich as Councilors, and Melba Orgill as Sec-Treas.

Mrs. Helen Orgill is organist of the new Picture Butte Ward.

BOOST THE SWIMMING POOL

Before another publishing day the exact location of Raymond's Community Swimming Pool will have been definitely made. There have been no hitches in the plans at all to date, and the delays have been due to the fact that officials of the project and the Town wanted to be very sure before anything at all was done that there would in the future be no misunderstandings and entanglements to mar the peace of its operation.

With seeding about over, this is an appeal to every loyal citizen to offer his assistance in this venture, and help put the work over with as low cost as possible. Every dollar contributed in labor, hauling, etc., will hasten the completion of the job that much, and will give the Committee that much more money with which to carry out their elaborate program of improvement and beautification.

There have been numerous questions in connection with all sites so far suggested, and hours of study and discussion have been had by the Committee and the Town Fathers respecting the final decision. There are also many public conveniences that as a Town we are very badly in need of, and if the Swimming Pool can be the nucleus of something in the way of a program toward the realization of some of the needs, then everyone wants it put where it will serve toward this purpose. It may be a Mass Meeting will be called to get the opinion of the citizens with respect to this question, although this is not definite, as the Ratepayers last January instructed the Council to go ahead with the proposal.

If any of those whose personal affairs will allow of their helping in the construction of the Pool would leave their names at the Town Office, the Recorder Office, the Post Office, with A. H. Zabriskie or any other member of the Committee as to when and what kind of work they could assist in it would facilitate matters greatly. The first few days of this week found

hundreds trekking here and there for a plunge, & hundreds of others wishing for a place where they might swim, and so removed any question whatever as to whether or not we really should have a Swimming Pool for Raymond.

Let's get it. And when work is started let us try and shape our individual affairs that the work can be pushed to completion, and the project made a real asset and credit to the town.

THE STAMPEDE IS COMING

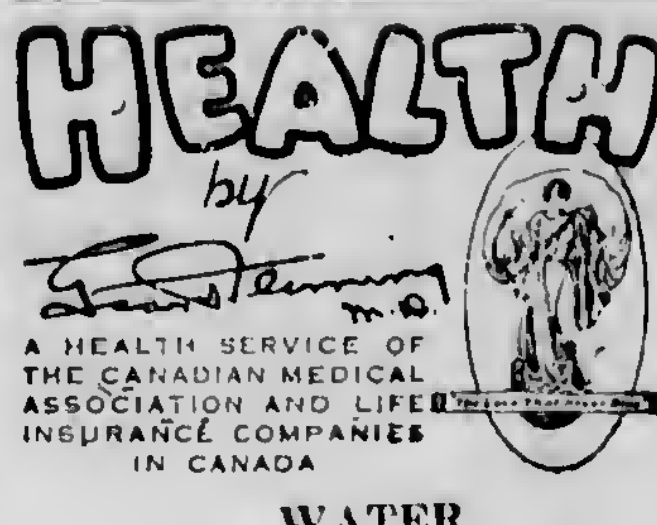

Raymond's Annual Stampede is scheduled this year for June 30 and July 1st, and will be bigger and better than ever. Several hundred dollars is being spent to remodel the grounds to make for a bigger and better show. The Committee are in the happy position of being able to pay for this out of present funds, without having to damage the credit of the Town, Board of Trade or Stampede Committee, and when the programme is started the first day, Raymond will have the best Stampede grounds in Southern Alberta.

This appeal is made to make every citizen of the Town and District to become a real "STAMPEDE BOOSTER." There have been misunderstandings in the past on the part of many that have made them kickers and knockers of the Stampede. Despite this the Committee, out of a sense of public duty, and the feeling that a celebration on our national Holiday was essential for those unable to visit other points for the day, have gone ahead year after year and sacrificed hours and days of time, without any of them making a single dollar. The Stampede Committee have a reserve, which is jealously guarded to meet any difficulties which may arise out of a storm, poor crowd or other unavoidable conditions. There has never been a Committee member in the past seven years that the writer knows of who has ever received a dollar for their time, and only a few have received expense money incurred in connection with the work they have done. For a number of years past Ray Knight who has furnished the horses, & Meeks Brothers the cattle, have never received a cent, and the one or two years that they have had anything it has been nowhere near enough to pay for the flesh lost on the stock, to say nothing of the time required to round the stuff up and prepare it for the show.

Now these men are not quitting, nor complaining. The Stampede is going on, but it would be a much easier task to put it

over if everyone would boost for it, and praise the men who labor year after year to make it a success instead of knocking their efforts and talking about what a slice they make out of it. There are hardly any of the Committee members but have and likely will continue to see Stampedes in other towns and cities, so that our show is not for their entertainment nor convenience. But, there are many in town, and especially old people and children who look forward to the Raymond Stampede as the highlight of their entertainment for the year, and because of these and the advertising it brings to the Town, the Committee feel the show should go on.

Boost for it this year if never before and help make it what it should be.

WATER

The fear of disease which accompanies floods and similar catastrophes arises largely out of an appreciation of the danger that wells and other water supplies may have been contaminated.

One of the greatest factors in the prevention of disease has been the safeguarding of water supplies. We cannot live without water, and because of this universal daily need a contaminated supply endangers all who use it.

A large part of the body weight is water. We all have water on the brain in the sense that a high percentage of the gray matter is water. Loss of body fluids is serious when it reaches 10% and, if the loss is continued, there is a point where it is fatal.

Water serves as a vehicle for foods. Just as the body itself is made up largely of water, so also are the foods which we consume. Even if we do not drink any fluids with our meals we actually take in quite a quantity of water as a part of the solid foods eaten.

Internally, water is essential for certain of the chemical changes which go on in the body. The body fluids are required to act as lubricants, and the heat of the body is regulated through the evaporation of water—perspiration—from the surface of the body.

Considerable quantities of

water are lost regularly from the body each day. Even when there is no obvious perspiration the skin is kept moist, and approximately one pint a day of this "insensible perspiration" is evaporated.

With every breath taken, water is lost, as can be shown when we breathe on glass. Dogs and other animals which do not perspire get rid of their excess heat by rapid breathing or panting. From the lungs are lost the volatile waste products, from the kidneys, the non-volatile in watery solution. Any excess of water in the body is eliminated by the kidneys.

The amount of water required depends upon the kind of work done and the temperature. A man doing heavy manual work on a hot summer day, need considerable quantities of water as compared with the man who sits quietly in a cool office.

The sense of thirst is the signal provided by nature to indicate the body's need for water. Neglect in responding to this signal may blunt the sense of thirst and so limit its value. It is likely true that a majority of people would be the better for drinking more water and that is why, it is suggested that a glass or two upon rising and between meals is a desirable habit to establish. The excessive use of fluids is not desirable and may be harmful.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

DUCK - TURKEY AND STREAMLINED BIRDS

Fashions in the size and shape of turkeys for the dinner table seem to follow in the wake of modish apparel. In the British Market the trend is towards smaller turkeys; in Canada the big turkey with honest to goodness proportions holds sway, while in Australia the distracted breeders are in search of a streamlined bird in order to satisfy the latest demands of consumers. On this subject the Fish Trade Gazette of London, England, remarks "large turkeys for our (British) trade are each year going out of favor."

To meet the requirements of these days of apartments with small ovens the Turkey Breeder Association in Australia is in search of the "streamlined" turkey. Experiments are being started in Sydney to breed a bird of shorter leg, deeper chest and broader back to fit an ordinary gas oven. The turkey should also be lighter in weight. The aim of the breeders is a turkey which will look something like a duck in shape."

AT A MEETING OF THE TOWN COUNCIL HELD ON MAY 21st, Price and Regulations for the use of Water from Taps used on Gardens for the Year 1936 was fixed at \$5.00 for the Season.

Single Hose ONLY to be Used at One Time

Hours for Use of Water on Lawns, Gardens, Etc., are as Follows:

5 a.m. to 8 a.m. East of Broadway.

and from

6 p.m. to 9 p.m. West of Broadway

Persons found using the Water at any other hours on Lawns or Flowers, will be prosecuted.

A Fine, not to exceed \$50.00, may be imposed for using the Water out of proper hours, or without having paid the Annual Fee.

By Order of Town Council.

WEEKLY LETTER

SUMMER-FALLOWING FOR DRIFT CONTROL

Summerfallowing has commenced on the Experimental Station at Lethbridge and as soil drifting must always be given first consideration here, a number of methods of cultivating ploughless fallows are being tried to determine which will leave the maximum amount of stubble on the surface as a protective trash covering. All of the fields were cut with a binder last fall and, as most of the dry land crops were only fair because of drought, there is but a light stubble.

Where the stubble is clean enough for the duckfoot cultivator to operate, this implement leaves most of the trash on the surface—if the duckfoot can run deeply enough to go under the foot crowns of the stubble. Different depths of cultivation have been tried and about four inches seem to be satisfactory. This loosens the soil deep enough for the rod weeder to be used for the next cultivation.

This first cultivation with the duckfoot and one or two subsequent cultivations with the rod weeder or duckfoot are usually sufficient here to keep the fallow clean, but in wet seasons, or where perennials such as Canada thistles are present, more cultivations are required.

Russian thistles grew up in some of the stubble last fall to such an extent that the duckfoot cannot be used on those fields. The one-way disc works satisfactorily, however, if used when the weeds and the top

soil are dry and if run at a proper depth, leaves a good trash covering on the surface.

If the one-way has been used for the first cultivation, the rod weeder is preferred for later cultivations if it will operate, as two or more times over with the one-way usually covers the trash too much unless there is a very heavy covering.

Where Russian thistles have grown too large to handle and burning is necessary, it has not been safe to conduct ploughless

fallows. It is doing much to bring soil to the surface each year.

Ploughing and ploughless fallows have been compared at the Station for eight years and there has been no significant difference in yields.

Ploughless fallows are being used in the experimental station at Lethbridge.

ICELAND? NO IT HAS NO ICE

New York — Arni Johnson, Iceland journalist, landed in New York May 7 to give the following explanations of his country and countrymen.

1. There is practically no ice in Iceland even in winter.
2. Icelanders are the tallest of races because they eat mainly fish.

Mr. Johnson came to America aboard the Iceland steamer Katla, which, according to the cargo agents was the first ship flying the Icelandic flag to dock in New York since 1923.

The vessel, of 1209 gross tonnage, left the capital of Iceland Reykjavik April 17 with a cargo of 900 tons of salt fish consigned to Gloucester, Mass. New York and Cuba.

"Now," said Mr. Johnson, among other things we should like to correct for once and for all the wide-spread belief that Iceland because of its name is eternally covered with ice. That is not so. In fact Reykjavik, the largest city with 35,000 inhabitants hardly ever has a speck of ice. During winter we have to drive miles into the country to find enough ice and snow to ski and skate upon."—The Christian Science Monitor.

Magistrate Low of Cardston held court here on Tuesday and heard several cases.

H. E. Wynder spent the weekend in Cardston returning Monday evening to his work at the Sugar Factory where he is helping to rebuild the brick work around the boilers there.

Shirley Temple in "Captain January" at the Capitol on Wednesday drew a large and enthusiastic crowd both in the afternoon and evening.

When a ferry in Czechoslovakia capsized thirty children and a man were drowned in the Thaya river on their way to a picnic. Only seven children reached the shore.

Cutting Your Costs

Manufacturers and big stores fully realize that their costs are materially lessened by a regular system of advertising.

Advertising lessens sales resistance by creating a demand for the goods you have to sell, thus cutting your costs.

Advertising in this Paper gives you an extra window to your store that people may examine at their leisure at home.

Unless you display your goods and let people know by advertising what you have, your costs are that much higher.

Therefore

FUNERAL TUESDAY FOR MRS. JOHN GENGYL

The funeral services were held on Tuesday over the remains of Mrs. John Gengyl, aged 21, who passed away Sunday forenoon in St Michael's Hospital, Lethbridge, death being due to an emergency operation and hemorrhage following confinement. Rev. Buchan of Calgary conducted the services and interment was made in the local cemetery. Deceased leaves a husband and two small children to mourn her passing as well as a large circle of friends.

WILL START HARD SURFACING ALBERTA ROADS THIS SEASON

Hard surfacing of Alberta main highways looms with certainty for this year.

Realizing the tremendous importance of tourist traffic and the need of hard surfaced or paved highways the Alberta government is taking steps to initiate a big program. It has been stated officially that this will be the commencement of a five-year program to cover 1,000 miles, involving the expenditure of several million dollars.

Hon. W. A. Fallow, Minister of Public Works gave the matter his personal attention while on a visit to the southern part of the province recently.

The hard surfacing includes 46 miles from Calgary to Banff which will be completed. Besides some 40 miles from Calgary to Carstairs also is ready.

Rebuilding of gravel roads will be carried on in the southern part of the province and also on the Edmonton-Wetaski stretch, besides other sections of the highway system.

The Minister has announced that it is planned to lay first-course hard surfacing this year to be followed by the "seal" coating in 1937.

Improvements to market or secondary roads also are planned by the Provincial government the fact that these act as important feeders to the main routes being recognized.

Also the government plans to rebuild some 50 miles of the Jasper highway, which will be graded and gravelled.

The news is welcome by the Alberta Motor Association which has led the campaign for years in urging the need of hard surfacing of Alberta highways.

Census of the Three Prairie Provinces

The quinquennial census of the three Prairie Provinces—Manitoba, Sask. and Alberta, will be taken on Monday June 1. The Dominion Bureau of Statistics points out that it is specially important at the present time that a complete and accurate inventory be obtained.

There are twelve inquiries which deal with the occupation industry, the industrial status unemployment, employment and earnings of the gainfully occupied population. It is hoped that every question will be answered fully and it should be noted that there need be no fear that information given will be available to everyone. The utmost secrecy is preserved and in no circumstances will any information supplied by individuals be used as a basis for taxation or for any other purpose. All officials and clerks are bound by an oath of secrecy.

In addition to the questions dealing with occupation, industry and status, certain inquiries relating to unemployment, employment and earnings will be addressed to all persons reported as wage or salaried workers.

Persons not at work on June 1 will further report the reason and the number of weeks since last employed. Those with jobs will be asked whether employed on full or part time basis or on relief work and the number of weeks worked during the last twelve months. Every wage earner will be expected to state the total amount of his earnings during the past twelve months.

Not only will the census give a comprehensive picture of the occupational scene on June 1 but it will describe its more permanent features as well. The census will tell for ever community what its working members were doing for a living on June 1 and also what they usually do. Such information is useful in formulating a policy of re-employment and placing.

Much interest and concern exists today, as to the number of unemployed in the country distinct from those in receipt of relief. Unemployment in depressed industries as well as in the various grade of occupation, will be fully understood from the facts gathered at the census. The eight the census will throw on the duration of unemployment

in the Prairie Provinces as well as the extent of part time employment will be very useful in framing remedial measures to meet the situation.

It is recognized today that young people represent a special problem. Young persons who have now come into the labor market as competitors for available jobs will receive special attention. It is proposed to record them separately from the unemployed who have followed an occupation at some time prior to the census and to find out how many have been trained to fill a number of clerical, technical and professional occupations.

Statistics of earnings of wage earners are increasing demand. The knowledge will be useful in gauging the relative need of different economic groups and for setting up uniform wage standards in each province or in specific localities within each province.

The Provinces of Alberta, Saskatchewan, Manitoba, New Brunswick, Nova Scotia, and Prince Edward Island are operating under the Hatchery regulations and producing chicks only from selected blood-tested flocks.

A Great Subscription Bargain that SAVES YOU MONEY
and gives you year-long enjoyment

Here is a real offer that will save you money . . . Give yourself and your family lasting enjoyment and entertainment the whole year through . . . This is all you have to do.

Select any 3 of these famous Magazines
 Together with your local Newspaper

and you will receive the whole 4 publications for one year from the date we receive the coupon. Here is the amazing combination low price.

\$3.00

- ☐ Maclean's (24 issues) 1 yr.
- ☐ Chatelaine 1 yr.
- ☐ Canadian 1 yr.
- ☐ National Home Monthly 1 yr.
- ☐ Pictorial Review 1 yr.
- ☐ Canadian Horticulture and Home Magazine . . . 1 yr.

Our Guarantee to You!
 This wonderful offer is available to old and new subscribers to this newspaper. We guarantee the fulfillment of all magazine subscriptions and you have positive assurance that this generous offer is exactly as represented. Renewals will be extended for full term shown.

MAIL COUPON TODAY

Please clip list of Magazines after checking 3 Publications desired. Fill out coupon carefully.
 Gentlemen: I enclose \$ Please send me the three magazines checked with a year's subscription to your newspaper.
